

AI-EMPOWERED LEADING SAFe 6.0 TRAINING AND CERTIFICATION

WISELEARNER

WHAT IS SAFe AGILIST?

- The SAFe Agilist (SA) certification is designed for professionals who want to understand how to apply Lean-Agile principles across an organization and support enterprise-wide business agility.
- The Leading SAFe program provides an understanding of the Scaled Agile Framework (SAFe), including Lean-Agile leadership, Agile Release Trains, PI Planning, product development flow, DevOps, customer-centricity, and Lean Portfolio Management.
- The AI-empowered version also introduces practical ways to use AI-driven techniques and prompting to support leadership, decision-making, organizational alignment, and value delivery.

BENEFITS OF SAFe AGILIST

- Build a strong foundation in enterprise-level Agile and Lean principles.
- Understand how to scale Agile practices across multiple teams and departments.
- Learn how Agile Release Trains support the flow of business value.
- Develop skills for effective PI Planning and execution.
- Understand how to connect business strategy with Agile delivery.
- Learn techniques for improving collaboration between teams and stakeholders.
- Gain knowledge of Lean Portfolio Management concepts.
- Understand customer-centric product development and Design Thinking.
- Explore DevOps and Continuous Delivery Pipeline concepts.
- Strengthen Lean-Agile leadership capabilities.
- Learn how AI can support Agile leadership and organizational agility.
- Develop skills for managing change in complex business environments.
- Earn the SAFe Agilist certification upon successfully passing the certification examination.
