

PROJECT MANAGEMENT PROFESSIONAL (PMP)

(JULY 2026 - CERTIFICATION EXAM UPDATE)

WHAT IS PMP?

- PMP (Project Management Professional) is the world's most recognized project management certification from PMI. It demonstrates your ability to lead projects successfully using predictive, agile, and hybrid approaches across industries.
- The latest PMP reflects modern practices from the PMBOK Guide – 8th Edition, covering AI, sustainability, digital transformation, and leadership skills essential for today's business challenges.
- Our PMP training blends theory with practical case studies and real-world scenarios. It equips professionals to manage scope, schedule, cost, quality, risk, and stakeholders — while preparing them to clear the PMP exam with confidence.
- Whether you are an experienced manager or an aspiring leader, PMP builds the strategic, technical, and leadership capabilities needed to deliver successful projects in any organization.

BENEFIT OF PMP

- Globally recognized across industries (IT, finance, healthcare, manufacturing, consulting)
- Adds strong value to your resume and career profile
- Builds confidence to lead projects successfully
- Opens doors to higher paying opportunities
- Connects you to PMI's global network of 750,000+ professionals
- Strengthens stakeholder management and governance skills
- Equips you with sustainability know how for long term impact
